

# Case Study of Pixel Wp

## Home page

For Header Section:-

- 1) In the header Section: - Upper level pages are dynamic. We can add some more pages as well as edit their names as per our choice through Admin panel.
- 2) We have implemented JQuery for the navigation links ( lavalamp JQuery )
- 3) We can see the Title of the page and some description of the page. This is also dynamic.
- 4) We can edit that description through Admin panel and for that we have added one custom field in the page.

For Inner Section:-

- 1) In the inner section List of “Here’s what you will get!” is also dynamic. For that we have created category and we have created no. of post as a list item .so we can change the name of list item as well as we can also add the list item through the Admin panel.

## Features

### Social bookmarking Inbuilt

From time to time you may want to update your Word

- 1) For Home page inner section we have implemented Tabs and these tabs are also dynamic. So we can add some more tabs.
- 2) Items listed in the tabs are dynamic so we can also add item in tab. we can edit the text of Items and we can also change the image of items through Admin panel.

Today Wordpress has gone far beyond its original use. The use of Wordpress is no more limited to blogging. People are using Wordpress themes to create their entire website. If you want to tap the potential of Wordpress and want to create WP theme that will not only just get the attention of your website visitors but also retain them for a long time, WPoo.com is here to help you.

Very often stunning Wordpress themes go wasted because the PSD to Wordpress conversion does not match the industry standards. Poor quality PSD to Wordpress theme coding can affect the functionality of your Wordpress website. Moreover, the resulting substandard Wordpress website fail to impress your customers because the internet users are highly demanding these days and they want nothing but the best.

PixelWP.com, offers its customers with excellent PSD to Wordpress conversion services that you can count on. You can confidently send your PSD to WP Theme conversion needs to us and be sure of the quality of the services.

If you are still undecided about your PSD to Wordpress conversion service provider, here we have some very good reasons why you should try our PSD to Wordpress theme coding services:

#### Why should you use PixelWP for your PSD to Wordpress conversions?

We ensure that each page is fully functional and cross-browser compatibility.

All the pages that we convert from PSD to Wordpress are fast loading and they are search engine friendly.

We provide you with 100% manual coding and we do not make use of any software or automated PSD to WP theme conversion tools.

We are consistent with the quality of our PSD to Wordpress conversions.

We have the most competitive pricing structure for all our PSD to Wordpress Theme coding services.

We ensure the fastest turnaround time for all PSD to Wordpress conversions.

We pay attention to details to ensure the most perfect Wordpress themes.

We have the most experienced team of PSD to Wordpress conversion experts to perform your PSD to WP theme coding.

We are highly professional in all our dealings with our customers, right from receiving the orders and sending the final output to our customers.

PSD to Wordpress

Contact us with your requirements and we will get back to you promptly.

- 1) In The home page inner section all the above contents are also dynamic and we can edit this text through Admin panel.

### Sidebar Section:-

- 1) In the Sidebar section “Customized Word press Services” is dynamic. For that we have created category and the list of services are posts of that category.
- 2) We can add some more services and edit the name of services through Admin panel.
- 3) Testimonial is also dynamic. We have created category for that and no. of testimonial are posts of the Testimonial category. So we can add more testimonial. And we can edit the photo of the client through Admin panel as well.

4) For the sliding Testimonial we have implemented the Slider.

The image shows a website layout with several sections:

- Recent work:** A dark blue box with the text "Have a look at some of our **Recent work !**" and a "PREVIEW THEME" button.
- Customized Wordpress Services:** A dark blue box with the title "Customized Wordpress Services" and a list of services: "Plugin Creation", "Shoppingcart Integration", "Advanced Theme panel Option", and "Customized Administration Login". It includes a "REQUEST A QUOTE" button.
- Testimonial:** A section titled "Testimonial" with a quote: "Though we hired WPoo.com with little hesitation in the beginning, this company prov". Below the quote is a client profile with a silhouette icon, the text "Name of a client", and "Company".
- Footer:** A dark blue footer containing:
  - A "Have a question or need help ?" section with an envelope icon and a "Send us an Email" button.
  - A "We Specialize in" section with logos for "php", "MySQL", and "AJAX".
  - A "Join Our Newsletter" section with an "Enter your email" input field and a "GO" button.
  - Copyright information: "Copyright © 2009 pixelwp.com, All rights reserved."
  - Navigation links: "Home . About . Contact . Examples . FAQ . Features . Login . Order Now . Services ."
  - Standards information: "We care about standards! Xhtml1.0 | CSS 2.1"
  - A vertical "TO THE TOP!" button on the right side.

1) At footer the listed pages are also dynamic. So we can add more pages in that list.

2) In the footer section for “join Our Newsletter” we have used “wp-ajax-newsletter” plugin.

This will allow users to subscribe and receive a newsletter containing the latest blog posts.

## Features

Currently, it supports sending a newsletter:

- Automatically after a specified amount of posts are published
- On a monthly or weekly basis
- Manually from the back-office

Users subscribe to the newsletter in the front-office, using an Ajax component, and are not required to be registered. Subscriptions must be validated either by an administrator, in the back-office, or by using a link provided in the confirmation email. Additionally, users can also unsubscribe using a quick link.

In the back-office, the newsletter can be customized with a header, footer, subject, and with a template for displaying posts (with real-time preview). The list of subscribers is also available with some basic functionality: activate and delete.

## Service Page

For Header Section:-

- 1) In the header Section: - Upper level pages are dynamic. We can add some more pages as well as edit their names as per our choice through Admin panel.
- 2) We have implemented JQuery for the navigation links ( lavalamp JQuery )
- 3) We can see the Title of the page and some description of the page. This is also dynamic.
- 4) We can edit that description through Admin panel and for that we have added one custom field in the page.
- 4) We have used “Breadcrumb-navxt” plugin for Breadcrumb

Description :-

Breadcrumb NavXT, the successor to the popular WordPress plugin Breadcrumb Navigation XT, was written from the ground up to be better than its ancestor. This plugin generates locational breadcrumb trails for your WordPress blog. These breadcrumb trails are highly customizable to suit the needs of just about any blog. The Administrative interface makes setting options easy

Breadcrumb NavXT distributes with translations for the following languages:

- English - default -
- German by Tom Klingenberg
- French by Laurent Grabielle
- Spanish by Karin Sequen
- Dutch by Stan Lenssen
- Russian by Yuri Gribov
- Swedish by Patrik Spathon
- Italian by Luca Camellini

### For Inner Section:-

This will control by Admin panel. We have add as well as we can Edit the content through Admin Panel.

### Sidebar Section:-

- 5) In the Sidebar section “Customized Word press Services” is dynamic. For that we have created category and the list of services are posts of that category.
- 6) We can add some more services and edit the name of services through Admin panel.
- 7) Testimonial is also dynamic. We have created category for that and no. of testimonial are posts of the Testimonial category. So we can add more testimonial. And we can edit the photo of the client through Admin panel as well.
- 8) For the sliding Testimonial we have implemented the Slider.
